

PRODUCT DATASHEET

Highlights

PERFORMANCE

Large badge feeder capacity and high print speeds are ideal for high-volume badge production.

PRACTICAL

The double loading tray enables printing from two different card stocks (e.g. visitors or employees).

EFFICIENT

Incomplete or incorrectly encoded cards are sent to the reject bin.

Main features

- High-capacity ribbons.
- Available with or without encoder.
- XF3 encoder compatible with MICROSESAME 2021 and higher.

BADGES PERSONNALIZATION

PRINTERS

FARGO PRINTER DTC4500

Encoding and graphic personnalization

The Fargo DTC4500 ISO card printer is a high-end color printer designed for businesses with advanced needs and high print volumes.

Connected by USB to a MICROSESAME server or client workstation, it is coupled with the badge background editor, which handles graphic personalization of badges (photo, text, logo, etc.) and RFID encoding.

Single- or double-sided, this printer guarantees high printing speed: 150 cards/hour with a color ribbon to 514 cards/hour in black monochrome printing.

Single- or double-sided, this printer guarantees high print speeds: from 150 cards/hour with a color ribbon to 514 cards/hour in black monochrome.

Finally, depending on the model or ribbons used, very specific printing techniques can be envisaged, such as fluorescence or badge lamination to increase the durability of the print over time.

INTEGRATED ACCESS CONTROL SYSTEM
